Wood Boiler Belvedere 5000

50Kw

HOT WATER OUTLET POSITIONS

BELVEDERE 5000
TOP & BACK VIEW
hydronic heating

The largest **Hydronic boiler**, the Belvedere incorporates some innovative changes to boiler design and operation.

- This Boiler will Heat 50kw of Hot Water
- Hot Water is not Stored in Boiler, only Heated
- Hot Water is Stored in a [Low Pressure Hot Water Storage Tank](#)
- From the [Low Pressure Hot Water Storage Tank](#), this Water can then be used for Domestic use and for Pumping through Hydronic Radiators or Slab Floor Heating.

The Performance

This wood fuelled Hydronic boiler will provide up to 50Kw of Hot Water.

1Kw of hot water will heat 1 square - so this unit has the capacity to heat up to a 50 square home.

The success is in the Design

The Belvedere has a large symmetrical firebox which will continue to give high output temperatures with extended times between refuelling.

Although primarily designed for installation in a plant room, it can also be installed in a living room and a glass door is available on request for an additional cost.

Specifications

Dimensions

Height to Hob	1,200mm
Width	585mm
Depth	710mm
Weight	280kg

Fire Box Dimensions

Height	600mm
Width	415mm
Depth	500mm

Clearances from Combustible

Left	100mm
Right	100mm
Rear	125mm

Flue

Diameter	150mm
Position	Centre

Hot Water Options

Hot Water Jacket	50Kw
